Work History

Web Developer (React.Js) - POC Pharma (2022 - current)

- Migrated the codebase from Vue.Js to React.Js, enhancing performance and maintainability.
- Built a full-featured UI library with multi-variant buttons, drawers, wizards, and more.
- Created reusable React components and custom hooks to improve maintainability.
- Participated in code reviews to uphold high code quality standards.
- Integrated RESTful API endpoints with React applications using React Query.
-Collaborated with UX/UI designers for responsive layout transformations.
- Contributed to PWA features for enhanced offline functionality.
- Implemented unit tests with Vitest and React Testing Library, achieving 80%+ code coverage.
- Delivered a technical presentation on micro frontend architecture.
- Partnered with product and design teams for UI/UX improvements.
- Contributed to the migration to React Native, implementing a UI Library, and several pages.

Web Developer (Vue.Js) - POC Pharma (2021 - 2022)

- Spearheaded the initiative and contributed to the development of a unified component library, standardizing design elements and enhancing consistency across the web app.
- Developed and deployed a comprehensive call planning system, featuring an interactive calendar and robust call management tools, enhancing sales representative productivity, and providing managers with effective monitoring capabilities.
- Participated in code reviews to ensure adherence to best practices

Databases: MongoDB, PostgreSQL, Firebase
Tools & Technologies: Git, Webpack, Docker, CI/CD
Testing: Jest, React Testing Library, Vitest
Performance Optimization: Code splitting, lazy loading
Deployment & Hosting: Vercel, Netlify, Azure
Soft Skills: Problem-solving, collaboration, effective communication

French teacher - (2017 - 2021)

Volunteering, private tutoring and classes of all ages.

SAP Logistics Consultant - Ericsson France (2015 - 2017)

- Master Data Management: Implemented strategies that reduced supply chain incidents by 50%, enhancing overall operational efficiency.
